Pollution Prevention Avengers

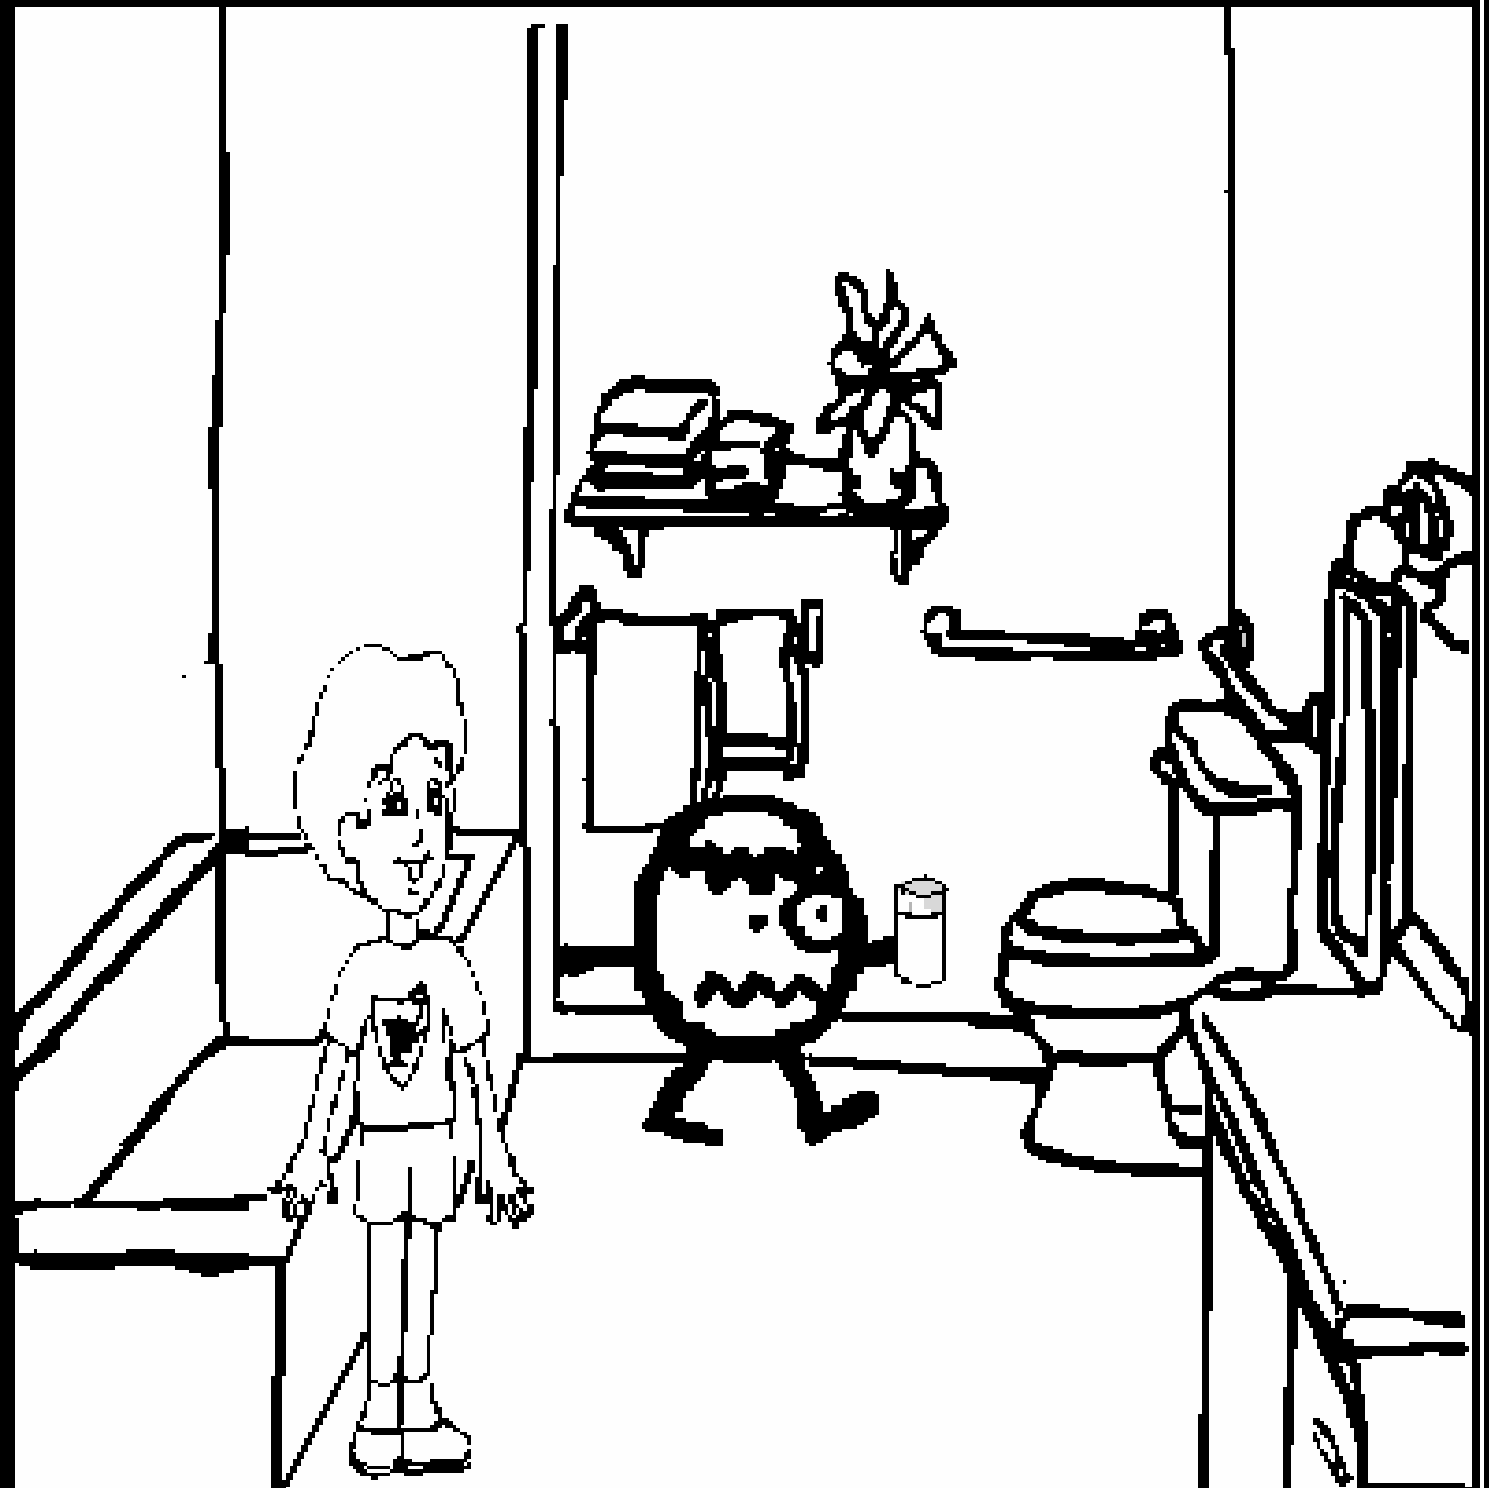

**Mr. Glumly and Bad
Medicine**

Mr. Glumly was tired because he had just finished playing football with the Smut Gang. He was about to wash his hands when he noticed a bottle full of pills that he could no longer use.

Mr. Glumly decided that he would flush the pills down the toilet. Just as he was about to throw them down the toilet a p2 Avenger showed up, and told Mr. Glumly that throwing the pills down the drain could hurt the fish and the river.

The avenger explained that the right way to handle old medications is to ask your parents to put water or oil in the bottle, and if the medicine is liquid to add some flour or kitty litter. Then put the medication into another paper bag and throw it in the trash.

Remember kids, everybody can be a p2 Avenger. We don't want the river to be polluted or fish and people to get hurt. All you have to do is remember never to throw medicines down the drain. Ask your parents to put the bottle in a bag and throw it in the trash or return them to your pharmacist. If you or your parents have any

questions please call the  Program at 873-7058 or 873-7059. Let's all try to keep our environment safe and clean.
